

Installing the most recent version of CAEPIPE:

Download and install the New CAEPIPE Setup File:

Step 1: Download the new CAEPIPE setup file from here: <https://www.sstusa.com/support-mes.php>.

Important Note: Please be sure to have the USB protected key, serial number 31433, inserted in the device where CAEPIPE is installed when downloading and installing the new CAEPIPE setup file accessed from the link above.

Step 2: Click the “**Click Here to Get CAEPIPE**” which is in bright burgundy letters in the middle of the page.

For ME&S (Maintenance, Enhancement and Support) and Non-ME&S Users

Download Your Software Update/Version of the CAEPIPE program (for both USB Hardware Key and SSTLM Protected versions) via PEXit.net

For enhanced user experience, we have moved the download section to SST's platform **PEXit**.

Customers can access PEXit using the link <https://www.pexit.net> from any browser on any device.

Customers can also download PEXit app for Android through Google Play Store 

Users can then Create a New Account or Login using their existing PEXit / Facebook / Gmail / LinkedIn account and download the CAEPIPE software through "e-Market > SST Software".

Click Here to Get CAEPIPE

Hardware Key Drivers –

- Sentinel Installer 7.6.9 (exe)
- Sentinel Installer 7.6.9 (zip)
- Sentinel Installation Instructions

CAEPIPE Manuals

- DOWNLOAD CAEPIPE Manuals, version 8.00

Step 3: You will be re-directed to **PEXit**, our new download platform. Make an account on PEXit (it only takes about 1 minute) or use your existing Google/Facebook/Twitter login to log into PEXit.

Step 4: At the menu on the top, middle of the page, go to “**e-Market**” and then under that submenu select “**SST Software**”.

Step 5: Scroll down to the 2nd box which is titled “For ME&S (Maintenance, Enhancement and Support) and Non-ME&S Users” and then click the gray “**Download**” box in the lower right corner.

Step 6: A box will pop up and should be prepopulated with your name and email address. Underneath that, it says “**Serial #**” and there is a blank field to enter your Serial Number. Enter your CAEPIPE Serial Number (referenced above in this email) and then click the blue box at the bottom right that says, “**Click Here to Get CAEPIPE**”. The box will expand and to the right side and now there is an .exe file or a .zip file available to download.

Step 7: Select the .exe or .zip file and download it. One downloaded, double click the .exe file to install the latest version of CAEPIPE that your company is eligible for.

Download the Updated CAEPIPE Manuals and Review the Tutorials:

Step 8: Download the CAEPIPE V.XX.xx User’s Manual, Technical Reference Manual, and Code Compliance Manual here: <https://www.sstusa.com/caepipe-docs.php>

Step 9: Review the Pipe Stress Analysis tutorial and 19 topic specific CAEPIPE Tutorials: <http://www.sstusa.com/caepipe-tutorials.php>

USB Troubleshooting:

The most common technical support issue that arises with USB keys is a problem with the driver. Make sure the USB hardware key is connected (green light should be on) and the USB hardware key driver is installed on the device. The driver is available for download here: <http://www.sstusa.com/support-install1.php>. The download link is in middle of the page under the heading “CAEPIPE Hardware Key Driver and License Manager”.

CAEPIPE Hardware Key Driver and License Manager

Be sure to check Installation and Troubleshooting Help sections before using any tool from here.

CAEPIPE Hardware Key Drivers/License Manager (Sentinel Protection Installer 7.6.9) FOR Windows 98/ME/NT/2000/XP/Server 2003/2008/Vista (32 bit and 64 bit)/and Windows 7
